fitted superellipse exponent p
2.6
2.4
2.2
2.0
1.8
1.6
1.4
$p = 2$ (Euclidean)
Concept pair
language, gender, register, code + random
Direction type
Metric
L^2, cos, KL
Perturb layer
$L = 2, 5, 10, 20$
Measure layer
penult ± offsets
Perturb method
additive
Model
Qwen3, Llama
Threshold
$L^2 \in [20, 200]$
